LTotal length9L1Total flange lengthL2The distance from the machine carrier to the disc1ELength of D shapeFLength of threaded part1kgMass1CdynDynamic load rating3CoStatic load rating2	7 mm
L1 Total flange length L2 The distance from the machine carrier to the disc E Length of D shape F Length of threaded part kg Mass Cdyn Dynamic load rating Co Static load rating	5 mm
L2The distance from the machine carrier to the disc1ELength of D shapeFLength of threaded part1kgMass1CdynDynamic load rating3CoStatic load rating2	5 mm
ELength of D shapeFLength of threaded part1kgMass1CdynDynamic load rating3CoStatic load rating2	5 mm
F Length of threaded part 1 kg Mass 1 Cdyn Dynamic load rating 3 Co Static load rating 2	8 mm
kgMass1CdynDynamic load rating3CoStatic load rating2	8 mm
CdynDynamic load rating3CoStatic load rating2	5 mm
Co Static load rating 2	5 kg
	5 kN
	5 kN
Pu Fatigue load limit 1	1 kN

## Sealing

## PLASTIC COVER+T SEAL / RS SEAL+METAL PROTECTIVE CAP

3-lip seal on the base side and the RS seal with metal protective cap on the front side. The plastic cover on the base side protects the seal from mechanical damage.
3-lip seal on the base side also protected with attached disc, protecting the bearing from contamination.

The RS seal with a Metal protective cap on the front side eliminates bearing contaminants.
