

# <u>Maintenance-Free Bearing With Integrated Flange</u> <u>For Harsh Tillage</u>

# IL60-140/5H-04

Maintenance-Free Bearing With Integrated Flange For Harsh Tillage

## **Technical Specification**

| J    | Pitch circle diameter              | 140 mm   |
|------|------------------------------------|----------|
| D    | Outside diameter                   | 176 mm   |
| D1   | Centar bore on the disc            | 103.2 mm |
| H/T  | Hole/Thread                        | 5x13 mm  |
| d    | Bore diameter                      | 35 mm    |
| С    | D-shape hole cut out dimension     | 32.5 mm  |
| М    | Outher Thread                      | M27x2 mm |
| L    | Total length                       | 149 mm   |
| L1   | Total flange length                | 79.5 mm  |
| E    | Required thickness of the disc arm | 37.5 mm  |
| F    | Length of threaded part            | 28 mm    |
| kg   | Mass                               | 5.212 kg |
| Cdyn | Dynamic load rating                | 75.86 kN |
| Со   | Static load rating                 | 66.2 kN  |
| Pu   | Fatigue load limit                 | 2.78 kN  |

### Sealing

#### SHEET METAL SHIELD + S SEAL / S SEAL + DIRTBLOCK SEAL + METAL SHIELD

Sheet metal shield and S seal on the base side and S seal and Dirtblock seal with Metal shield on the front side which is exposed to contaminants. Sheet metal shield and S seal together with attached disc eliminates the possibility of contamination from the base side. Dirtblock seal is designed for hard working condition at unfriendly environment. Half metal – half rubber outside diameter provides reliable seal retention in the bore and improves sealing performance. Inside diameter is covered by rubber and improves sealing performance and easy installation. Forged cover plate is additional, strong protection of the Dirtblock seal against mechanical damage. This sealing provides maximum protection against liquid or solid contaminants, which significantly extends bearing service life.
